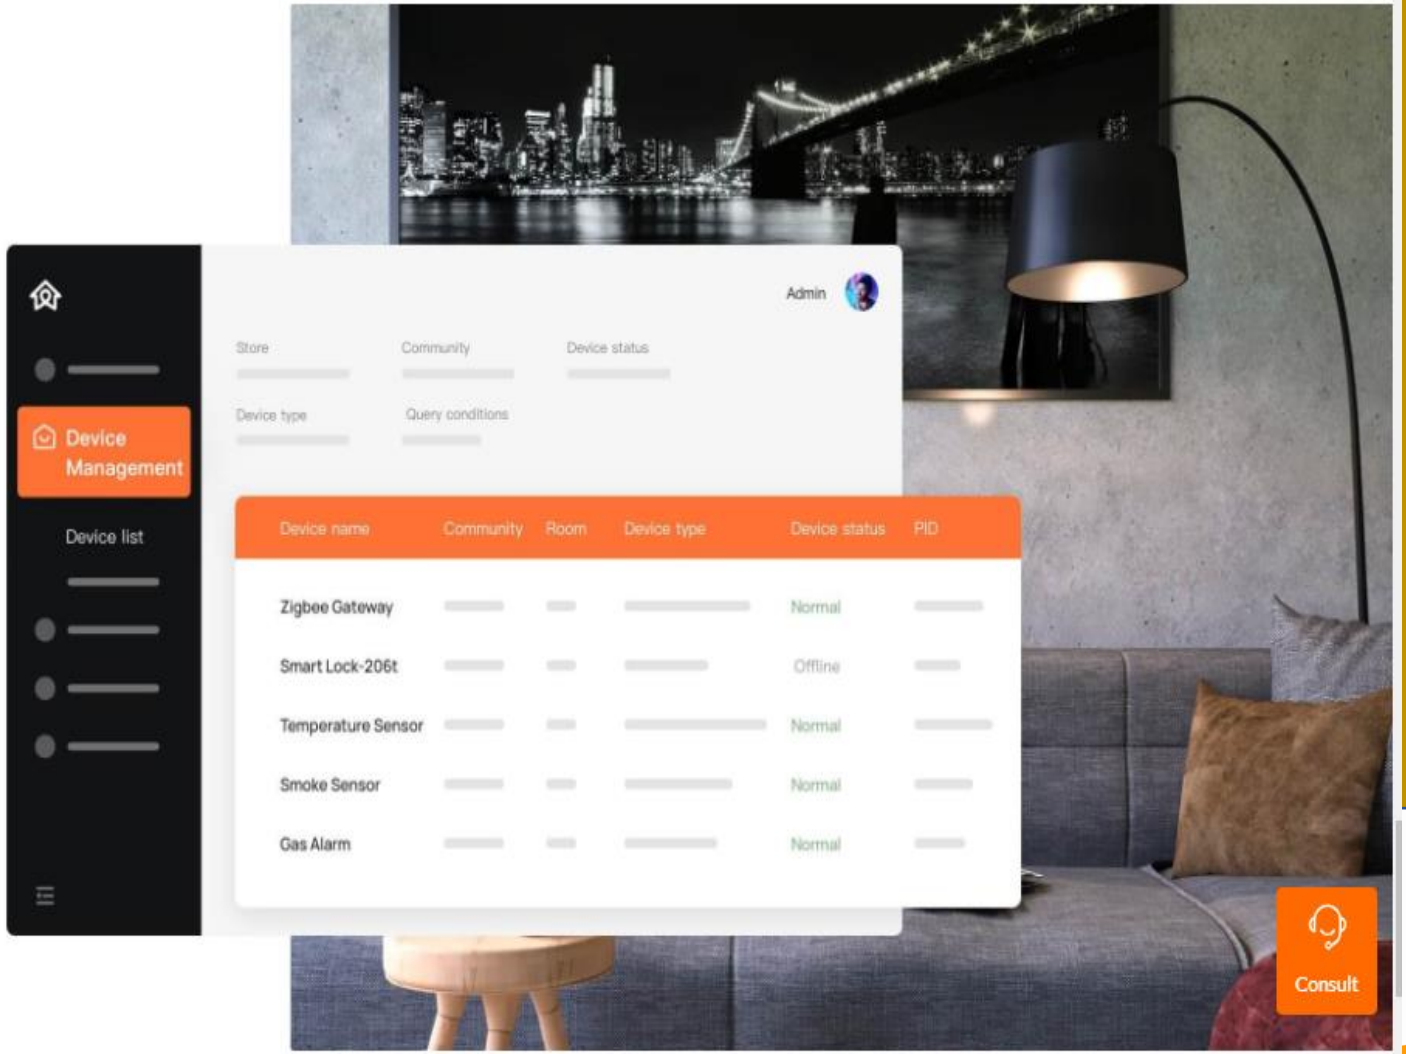
- Support door lock working conditions, password list, unlock log, key distribution
- Quick processing of equipment operation and maintenance work orders



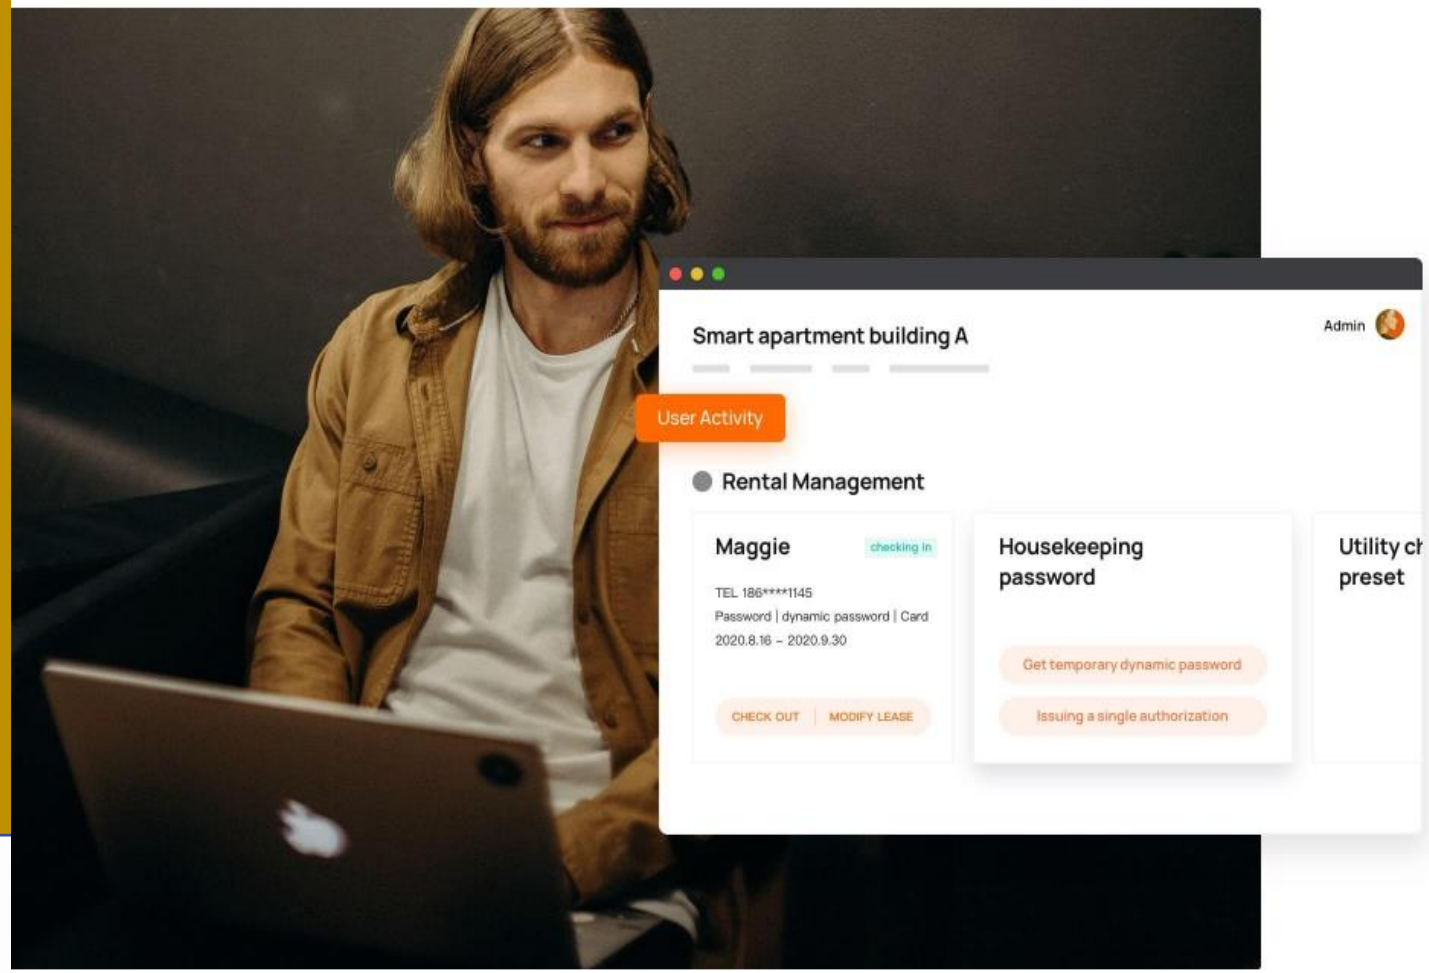
Smart Apartments Intelligent Living

Solutions

Smart Apartments Intelligent Living

Optimize Your Property's Efficiency,Increase operating income, tenant attraction and satisfaction

Smart Apartments Intelligent Living



Manage your property online

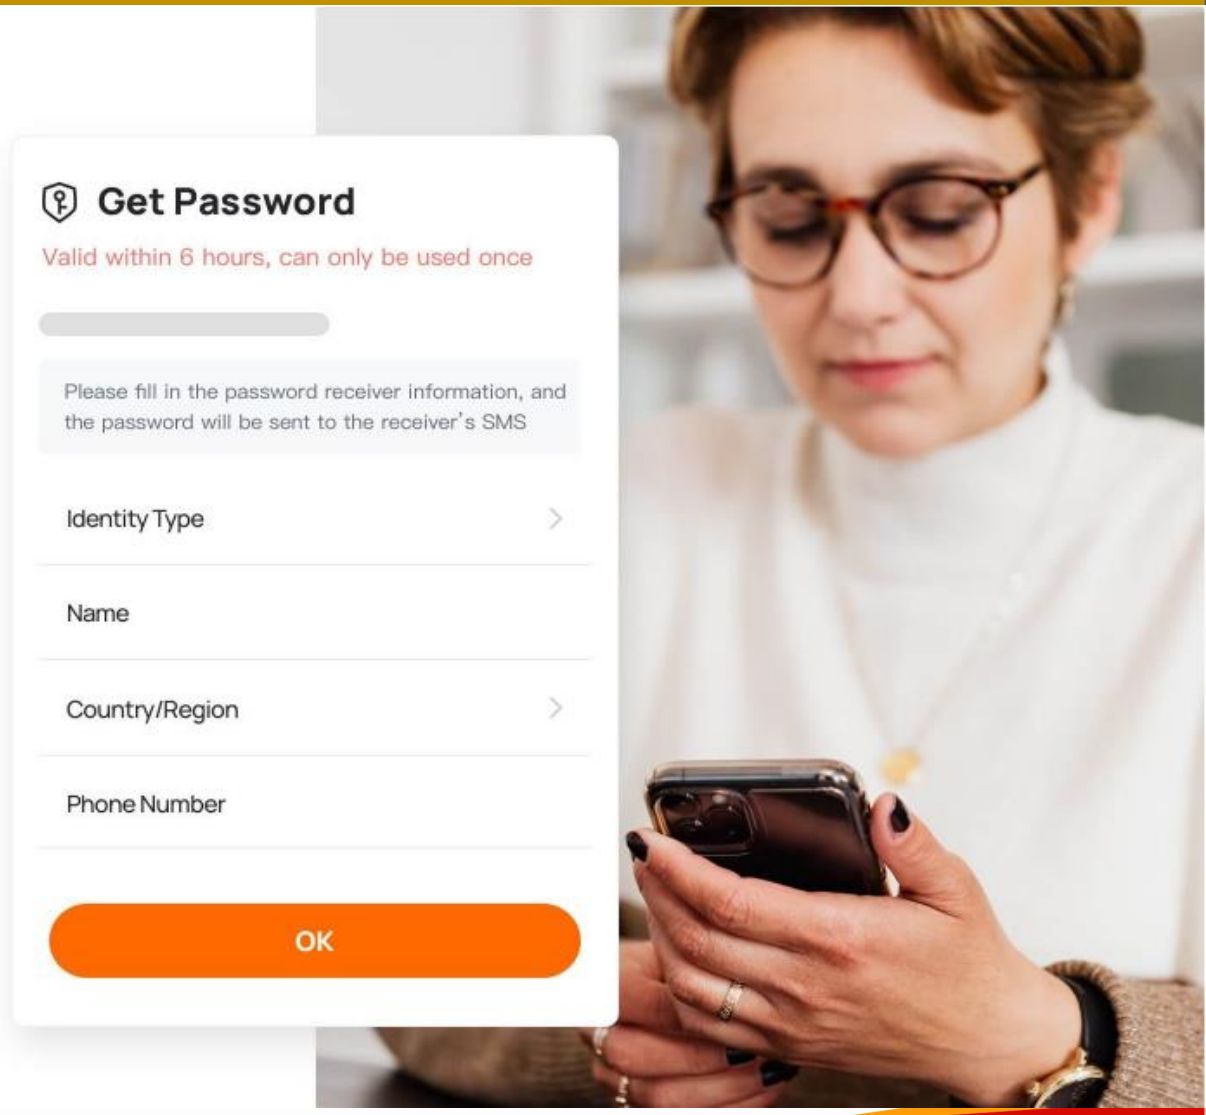
Can't be in the office 7/24? Our SaaS platform and APP allows you to issue a rental password at any time and any place to check the rental status of your property.

In addition to issuing passwords for tenants, you can also create one-time access and periodic access to control who can enter your property.

Create a temporary access with Self-Guided touring

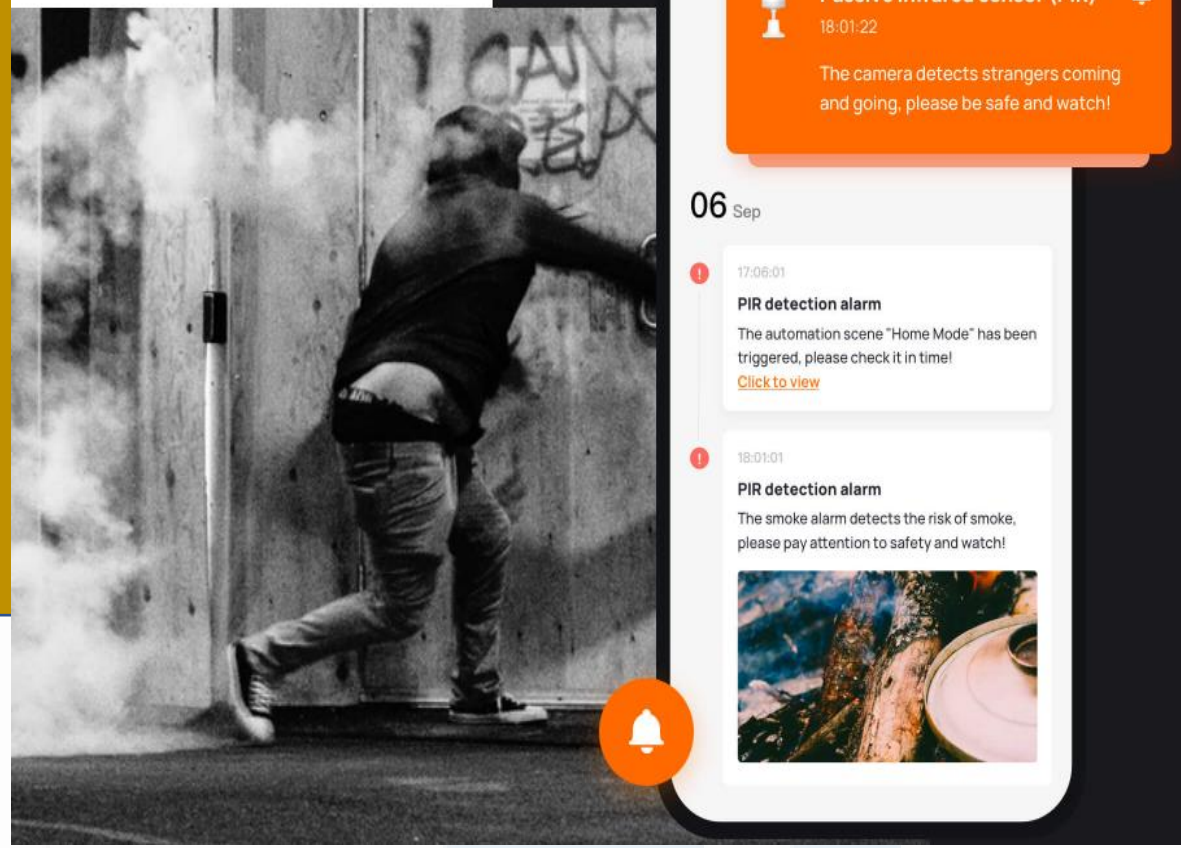
Property manager are time-consuming and labor-intensive to receive potential guests. They need to manage a large number of keys and come to receive them.

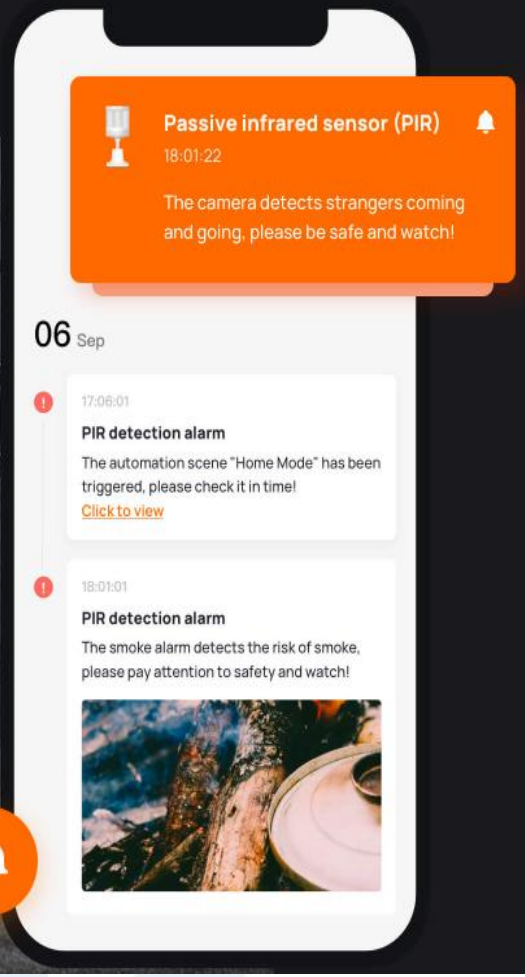
To use our solution, you only need to create a temporary access in the APP. You don't have to worry about losing any keys, because they have a limited validity period.



Smart Apartments Intelligent Living

Keep tenants and property secure with smart devices





Keep tenants and property secure with smart devices

Receive real-time alerts about threats, such as strangers forcibly disassembling smart locks, and people passing by in security areas.
